

K-Love Radio is truly a life line to millions. It is very important to our community. It has grown many of us, made better more positive encouraged citizens. Many businesses that allow it on the radio, work productivity is higher, more efficient. Attitudes are better. I have seen this also, as a manager in the past. Millions of people spend long hours in their cars, trucks as a part of their jobs, they depend on the positive and encouraging and true message that K-Love delivers. In our community thousands would be devastated and effected in a negative way if we lost this station. Please hear us! Our community is and will continue to be a better place with K-Love on the air and accessible. Many of our troops and others over seas need this radio staion. It is their hope. I need and rely on this station. I drive many miles a week doing my job. It is very uplifting, comforting, and real in my life. Many of the patients that I come in contact with heal better because of positive, soothing music and messages. K-Love is huge to us. Thank you!
